area with live music + Free time in Beautiful
Athens

16.6.2022 Thursday

Departure

AB DENTAL INTERNATIONAL IMPLANTOLOGY MASTER CLASS

ATHENS, GREECE 
JUNE 12-16, 2022

COURSE PROGRAM

Topic

“MORE WITH LESS” - IMMEDIATE IMPLANT PLACEMENT INTO THE SINUS

ADVANCED level including **LIVE PATIENT SURGERY**

Hosted by WAGRO, the World Academy of Growth Factors & Stem Cells in Dentistry, Athens, Greece

Course Program

1. Classical Sinus Floor Elevation techniques: Lateral Window, Crestal Approach
2. Intra & Post-Op complications during S.F.E. procedures
3. 1 and 2 step concepts, When and How
4. Atraumatic Techniques for Implant placement in the posterior maxilla
5. Vertical Bone Augmentation in the posterior maxilla
6. Use of Growth factors & Stem Cells during S.F.E. & IPG-DET procedures
7. Innovative IPG-DET technique, materials, instruments, cases, differences between IPG and SFE
8. Autologous Bio-materials and Membranes during SFE and IPG
9. Immediate Implant Placement in the problematic posterior maxilla
10. How to achieve the Initial Stability to a minimal bone crest in the posterior maxilla
11. Alternatives to the maxillary sinus lift: tilted implants Biomechanical of tilted implants
12. Atrophic maxillary rehabilitation without bone graft using tilted implants Prosthetic management: from immediate loading to finalization of the case
13. Pharmacological support
14. Swimming in “Blue Oceans”

Target Group

The course is intended for general dentists and Oral and Maxillofacial surgeons.

Course Abstract

The aim of this course is to present the use of innovative techniques and autologous biomaterials in Sinus Implantology, which not only help the surgeon to treat complicated cases with less invasive techniques, but also to complete them in a shorter time with better results. Also, to provide patients with a postoperative period without complications, to inspire them and make them “marketing makers” for the dental practice.

An important part of this course is the opportunity to experience Live patient follow-up and/or their possible complications. It’s imperative to see the consequences of your surgery, whether they are good or bad.

The participants will have an experienced mentor to help and guide them through this process and deal with any difficulties.

Learning Objectives

- Participate in all the processes of preparation and applications of growth factors. Understand the rule of the autologous biomaterials and the use of the appropriate equipment and tools.
- Understand how to achieve initial Implant stability in regions that bone can’t offer it.
- Learn about the IPG-DET technique.
- Learn how to place implants in the posterior problematic area of the maxilla without sinus floor elevation.
- Understand when can use Lateral window, crestal approach or IPG-DET technique.

This course will allow you to experience

- Live surgeries participation
- Real clinical timeframes
- Ethical environment
- Real patient follow-up
- Expert mentor guiding you

SPEAKERS

Prof. Dr. Ioannis P. Georgakopoulos

Dr. Ioannis Georgakopoulos is a dentist practitioner with expertise in Dental Implantology, entrepreneur and traveling healthcare provider from Athens-Greece. He is recognized as the inventor of the pioneer “IPG-DET” protocol that altered the clinical practice in dental implant placement as a reliable and solid alternative to Sinus Floor Elevation. Counting many years of research and clinical experience, Dr. Ioannis Georgakopoulos is a seasoned educator in clinical topics of: Growth Factors and Stem Cells in every day clinical practice, Guided Bone Regeneration, Sinus Floor Elevation, Surgical Extractions, and Oral Implantology. He is affiliated with the Medical School in the University of Bari “Aldo Moro” and WAGRO University, while he is a faculty member in the School of Health in BPP University of London. He has been a featured speaker at many national and international congresses and meetings all around the world, with a great number of scientific articles and books published. In 2015, he founded the World Academy of Growth Factors and Stem Cells in Dentistry (WAGRO), a non-profit organization expanded today in more than 37 countries that aims to encourage innovation and raise awareness of medical procedures based on the use of growth factors and stem cells in the fields of Advanced Dentistry. He was the first in the world to publish a

study on the use of allograft cord blood stem regarding GBR in implantology. Dr. Ioannis Georgakopoulos earned his DDS from the National and Kapodistrian University of Athens, he studied Medicine and received his PhD from the University of Patras in Greece and, his MSc in “Advanced Oral Surgery & Implantology” from the University of Bari “Aldo Moro” in Italy. Master in Laser Application from University of Vienna, Austria. He has also received an MBA from the Athens University of Economics and Business.

Prof. Dr. Angelo Cardarelli

Graduated with Lode in Dentistry and Dental Prosthetics at the University of L’Aquila in 2007. Specializing in Oral Surgery at the “Sapienza” University of Rome in 2010. He is an Adjunct Professor and tutor at the San Raffaele University of Milan. He is a Scientific Advisor to the Dental Clinic at the Department of IRCCS San Raffaele in Milan (Dean Prof. E. Gherlone). Visiting professor of International University of Agadir (Universiapolis). Member of Global Scientific Dental Alliance in Dubai. He works in Milan and Isernia, where he practices Implanto-protesis and Oral Surgery. Author of many publications, Speaker in International Congresses on Implantology and Oral Surgery. Member of the International Extraction Academy of California. Author of the Book: “Piezoelectric Surgery of Impacted Teeth” EDRA Publisher 2020.
